HOW I WORK · 02 PROVE AND 03 SCALE

The Data and AI Pilot Programme

Turning leadership priorities into proven results, one pilot at a time.

Most data and AI work stalls between a good idea and a measured result. The Pilot Programme closes that gap. Each cycle takes one leadership priority from question to proven outcome, and each one makes the next faster.

Each pilot, four steps

1
Choose
Agree the priority, the question and the decision it will change.

2
Check
Make sure the data can answer it, with governance in place.

3
Prove
Run the pilot and measure the result against the agreed goal.

4
Embed
What works becomes how the business runs. The next pilot builds on it.

What each pilot delivers

A clear answer
To a question the leadership team cares about.

A measured result
Time saved, risk reduced or revenue grown.

Governance that grows
Data and AI governance built step by step, never as a separate project.

The next opportunity
A rolling pipeline of the most valuable use cases to tackle next.

WHY THE VALUE BUILDS

Each pilot leaves your data cleaner, your governance stronger and your team more confident. The longer we work together, the faster each result comes.

Where it fits

01 Discover → **02 Prove** → **03 Scale**

Discover, through a leadership briefing, maturity assessment or opportunity workshop, chooses the first pilot. The Pilot Programme then runs Prove and Scale, delivered in-house or with a trusted delivery partner and shaped to suit your business.

Let's choose your first pilot.
